Students Sponsorship Program

BNP Paribas is offering funding of €20,000 to students for a Masters Program in financial engineering in New York.

Through its Student Sponsorship program, BNP Paribas Equities & Derivatives is offering up to five scholarships to help with funding for your Masters Program in financial engineering in the United States, at Columbia University.

Candidates will be pre-selected on the basis of applications to be submitted by 26 January 2007.
Through its Students Sponsorship program, BNP Paribas Equities & Derivatives is offering up to 5 scholarships for engineering students looking to further their studies with a Masters Program in financial engineering in the United States.

The Students Sponsorship program has two main aims: firstly, promoting study and advanced research in the area of financial engineering (development of new models, research work etc.) and secondly, training promising students, the financial engineering specialists of the future.

Eligible students

The Students Sponsorship program is open to all students with a one-year to 18-month place specializing in financial engineering at the following universities*:
- Columbia University

Selection criteria

Eligible students should apply for the scholarship before 26 January 2007 by sending:
- a cover letter
- a resume
- a copy of the application(s) for a Masters Program at Columbia University

To the following address:
BNP Paribas Equities & Derivatives
Students Sponsorship Program
Attn: Sylvie Goe - CLC01D1
20, bd des Italiens
FR-75009 PARIS

Selected applicants will be invited to attend a half day of tests and interviews, after which the scholarships will be granted on a conditional basis.

The scholarships will be granted definitively subject to the acceptance by the US universities of the students selected and on presentation by the students of a copy of this acceptance.

Terms of sponsorship

BNP Paribas Equities & Derivatives will pay a scholarship of EUR 20,000 to each of the students selected.

Each student will have monthly meetings with a financial engineering expert based in New York in order to monitor his or her performance over the year.
